PERMIT #758

FRESNO TO BAKERSFIELD HIGH-SPEED TRAIN PROJECT

Public Information Meeting

The California High Speed Rail Authority invites you to review the alternatives for the High Speed Train Project through Fresno. Incorporating comments received at the Fresno Scoping meeting held on March 25, 2009, and working with local staff and representatives, the Authority has developed alternative alignments and station locations that enable electrified trains to operate at 220 mph through Fresno, and to serve a Downtown Fresno Station. All of the alternatives would enter Fresno from the south alongside the BNSF alignment, then turn to parallel the Union Pacific Railroad (freight rail line closest to State Route 99) from Jensen Avenue to the San Joaquin River. All the alternative alignments and stations are elevated 60 feet above the ground.

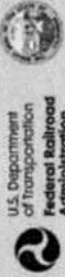

The Authority seeks your input on which alternative(s) you prefer and your ideas and comments on features such as location of the Downtown Fresno Station. Authority staff and consultants will be on hand to answer any question you may have on the project. Please come join us in this discussion, and invite a friend or neighbor.

Reunión de Información Pública

La Autoridad del Tren de Alta Velocidad de California (Autoridad) le invita a examinar las alternativas preliminares para el Tren de Alta Velocidad (HST) que pasará por Fresno. Por lo general, las alternativas apuntan a una estación HST adyacente a la estación de Amtrak, y llena los requisitos de diseño de un tren expreso a través de la estación, a una velocidad de 220 MPH (millas por hora).

Solicitamos su opinión en cuanto a cual alternativa(s) Usted prefiere, y también deseamos escuchar sus ideas. Representantes de la Autoridad estarán disponibles para contestar sus preguntas acerca del proyecto. Por favor acompañenos, y pídale a sus amigos y vecinos que también participen.
